## DOGLAS 250M

## **Material description**

Doglas 250M has high mechanical strength and very good dimensional stability. The material impresses with its high temperature resistance, excellent insulating properties and chemical resistance.

## Conformities

RoHS, REACH

These technical data have been determined as average values by our suppliers from many individual measurements. In all measurements, the test specimens were tested in the dry state. We pass on the data with reservation. The table does not claim to be complete or correct. Material technology is subject to constant further development. No rights or guarantees can be derived from it. Own tests are necessary because the environmental and operating conditions (humidity, temperature, mechanical forces, radiation and chemicals, etc.) set limits in the application.
